

# MOOD:PROFUSION iS

## A completely integrated media experience.

The future is here with the ProFusion® iS digital media manager. Powerful and affordable, the all-in-one iS is Mood's latest system capable of delivering music and audio messaging.

The iS provides total control over what your customers hear and see. Flexible scheduling, dual-zone audio capability, management features, and more make it the only delivery system you'll need to provide an engaging experience for your customers.

- + **Music Create the Perfect Vibe.** No other commercial media manager comes close—high-fidelity and stereo sound capability.
- + **Messaging Maximize the Moment.** On-site and on-hold music and messaging are seamlessly integrated to prevent abrupt interruptions.
- + **Presence Personalize the Experience.** Create a customized mobile experience for customers in-store with our exclusive Presence™ technology. The iS platform transmits a unique, inaudible Presence ID, able to be integrated into your existing app or our Presence solutions, including Shazam.

*As Mood's latest generation IP/Internet delivery device, the ProFusion iS replaces all previous on-premise platforms, including the MP 7000, Encompass MV/XD, and ProFusion X.*

## FEATURES & BENEFITS

- + **Automatic Easy Content Management.** Automatic scheduling allows you to change your vibe or tempo by the minute, hour, day, week, or season—switch your content schedule at any time.
  - + **Reliable Field and Time-tested.** Mood pioneered on-premise music players with reliable, flexible software for commercial environments over a decade ago. ProFusion is field tested, and over 100,000 devices later, remains the industry leader.
  - + **Flexible Multiple Update Options.** Secure Ethernet updates deliver data quickly, dramatically reducing the time it takes to receive music and message updates. The iS also supports disc updates with an optional built-in DVD-ROM drive.
- Heartbeat Feature.** This monitoring feature provides ongoing verification that devices in your locations are online, allowing the option to push priority updates as requested or needed.
- Remote Management.** Through the ProFusion iS Control Site you can block songs and artists, upload messages, modify daypart and message schedules, check the status of online devices and run reports.
- + **Powerful Multiple Zone Possibilities.** Two zones of audio, each with independent scheduling capability, creates a world of possibilities. Play music in one area and a different kind in another; or connect one audio output to your phone system for music and messaging on hold. And don't forget your video output.
  - + **Simple Effortless Operation.** Built-in display allows for easy adjustments to settings and shows music and messaging information. Automatic dayparting and other features make the iS as hands-free as possible.

# MOOD:PROFUSION iS
